Professional Carpet Cleaning Wand

Key Benefits

- Removable Nylon Glide for Easy Cleaning & Cost-Effective Replacement • Gasket Seal for Airtight Fit • Laminar Airflow Through Head & Tube for Faster Dry Times •

The brand new Trident CW13 is scientifically engineered to deliver the most extreme suction power, with ground-breaking durability and substantial financial rewards!

The Trident's tough, lightweight design allows for better ergonomics, which means less muscle strain and fatigue than a heavy stainless-steel wand.

Built with extremely durable and corrosive-resistant materials, as well as a fully replaceable gasket-sealed composite glide, this wand can withstand rough, rugged use for a substantially longer life, which translates to lower operating costs with a variety of cleaning chemicals.

You will experience noticeably quicker dry times from the laminar air flow design from tube to head. Deeper cleaning, tighter spray patterns and maximum high-velocity fluid flow with the dual jet spray system allows you to clean more carpet area with a quicker dry time so the floor can be occupied sooner.

Excited about innovations that create better durability and significant time and cost savings? This is the wand!

Trident Featured Specifications

- Durable, Rotationally-Molded LLDPE
- 6.5 lbs Lightweight Design
- 13" Cleaning Path
- Replaceable Composite Glide: Effortless gliding across all carpet types
- Anodized 6061 T6 Aircraft Aluminum Vacuum Tube: A strong, lightweight alternative to stainless steel
- In-Line Filter Prior to Spray Valve
- 3000 psi Solution Line
